Buyers information notice

Land and Business (Sale and Conveyancing) Act 1994 section 13A

Land and Business (Sale and Conveyancing) Regulations 1995 regulation 15A

Before you buy a home there are a number of things that you should investigate and consider. Though it may not be obvious at the time, there could be matters that may affect your enjoyment of the property, the safety of people on the property or the value of the property.

The following questions may help you to identify if a property is appropriate to purchase. In many cases the questions relate to a variety of laws and standards. These laws and standards change over time, so it is important to seek the most up to date information.

Various government agencies can provide up to date and relevant information on many of these questions. To find out more the Office of Consumer and Business Affairs recommends that you check the website: www.ocba.sa.gov.au/Realestate/

Consider having a professional building inspection done before proceeding with a purchase. A building inspection will help you answer some of the questions below.

The questions have been categorised under the headings **Safety, Enjoyment** and **Value**, but all of the issues are relevant to each heading.

Safety

- Is there **asbestos** in any of the buildings or elsewhere on the property

  e.g. sheds and fences?

- Does the property have any significant **defects** e.g. **cracking or salt damp**?

  Have the wet areas been waterproofed?

- Is the property in a **bushfire** prone area?

- Are the **electrical wiring, gas installation, plumbing and appliances** in good working order and in good condition? Is a **safety switch** (RCD) installed? Is it working?

- Are there any prohibited **gas appliances** in bedrooms or bathrooms?

- Are **smoke alarms** installed in the house? If so, are they hardwired? Are they in good working order and in good condition? Are they compliant?

- Is there a **swimming pool and/or spa pool** installed on the property? Are there any safety barriers or fences in place? Do they conform to current standards?

- Does the property have any **termite** or other pest infestations? Is there a current preventative termite treatment program in place? Was the property treated at some stage with persistent organochlorines (now banned) or other **toxic** termiticides as fill been used on the site? Is the soil contaminated by **chemical residues** or waste?

- Does the property use **cooling towers** or manufactured warm water systems?

  If so, what are the maintenance requirements?

Enjoyment

- Does the property have any **stormwater** problems?

- Is the property in a **flood prone** area? Is the property prone to coastal flooding?

- Does the property have an on-site **wastewater treatment facility** such as a septic tank installed? If so, what are the maintenance requirements? Is it compliant?

- Is a **sewer mains connection** available?

- Are all gutters, downpipes and stormwater systems in good working order and in good condition?

- Is the property near **power lines**? Are there any trees on the property near power lines? Are you considering planting any trees? Do all structures and trees maintain the required clearance from any power lines?

- Are there any significant trees on the property?

- Is this property a unit on **strata or community title**? What could this mean for you? Do you understand the restrictions of use and the financial obligations of ownership? Will you have to pay a previous owner's debt or the cost of planned improvements?

- Is the property close to a hotel, restaurant or other venue with entertainment consent for live music? Is the property close to any industrial or commercial activity, a busy road or airport, etc that may result in the generation of noise or the **emission of materials or odours** into the air?

- What appliances, equipment and fittings are included in the sale of the property?

- Is there sufficient car parking space available to the property?

Value

- Are there any **illegal or unapproved additions**, extensions or alterations to the buildings on the property?

ANNEXURE 'A' (1 page)

Electricity Infrastructure - Building Restrictions and Statutory Easements

It is an offence under section 86 of the Electricity Act 1996 to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the Electricity (General) Regulations 2012 regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the Electricity Act and Regulations may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the Electricity Act, the entity may seek a court order:

a) requiring the person to take specified action to remove or modify the building or structure within a specified period;

b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or

c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DMITRE for further details.

Statutory easements

Separate from the above restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists. However, where in existence, statutory easements provide these businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (Clause 2 of Schedule 1 of the Electricity Corporations (Restructuring and Disposal) Act 1999; section 48A of the Electricity Act 1996).

A statutory easement is not generally registered on the title for the land.
To avoid risking injury and damage, it is recommended that the location of underground services be confirmed by telephoning Dial-Before-You-Dig on 1100.

For further clarification on these matters, please contact SA Power Networks' Real Estate Branch on telephone 8404 5897 or 8404 5894.

Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)

Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:
a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*; section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (https://1100.com.au) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

***Land Tax Act 1936* and *Regulations* thereunder**

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

Animal and Plant Control (Agriculture Protection and other purposes) Act 1986* and *Regulations

Agents should note that this legislation imposes a responsibility on a landholder to control and keep controlled proclaimed plants and particular classes of animals on a property.

Information should be obtained from:

- The vendor about the known presence of proclaimed plants or animals on the property including details which the vendor can obtain from records held by the local animal and plant control board
- The local animal and plant control board or the Animal and Plant Control Commission on the policies and priorities relating to the control of any serious proclaimed plants or animals in the area where the property is located.

c) domestic building work commenced before 1 May 1987; or

e) building work in respect of which an exemption from the application of Division 3 of Part 5 of the *Building Work Contractors Act* 1995 has been granted under section 45 of that Act.

1. Building indemnity insurance is required: No

2. Name of persons insured: N/A

3. Name of insurer: N/A

4. Limitations on the liability of the insurer: N/A

5. Name of the builder: N/A

6. Builders licence number: N/A

7. Description of insured building work: N/A

8. Date of issue of insurance: N/A

Exemption from holding insurance:

If particulars of insurance are not given, has an exemption been granted under section 45 of the *Building Work Contractors Act* 1995 from the requirement to hold an insurance policy in accordance with Division 3 of Part 5 of that Act?

No

2. Name of builder granted the exemption: N/A

6 - Further information held by councils

Does the council hold details of any development approvals relating to:

a) commercial or industrial activity at the land; or

b) a change in the use of the land or part of the land (within the meaning of the *Planning, Development Act* 1993) or the *Planning, Development and Infrastructure Act* 2016?

No

Description of the nature of the development(s) approved:

Refer to the repealed *Development Act* 1993 Section of this document particularly Part 3 Development Plan, Section 42 – Condition (that continues to apply) of a development authorisation and Repealed Act conditions listed in this document.

The question relates to information that the council for the area in which the land is situated may hold. If the council answers "YES" to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from the council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.

A "YES" answer to paragraph (a) of the question may indicate that a **potentially contaminating activity** has taken place at the land (see sections 103C and 103H of the *Environment Protection Act* 1993) and that assessments or remediation of the land may be required at some future time.

It should be noted that—

- the approval of development by a council does not necessarily mean that the development has taken place;
- the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.
